

40' WIDE DOORS

Amarr® 2042 & 2742

2" Thick Steel Polyurethane Doors

- Designed to handle 90MPH wind pressures
- 8" specially designed trusses have very high strength-to-mass ratios making them light weight and very strong
- Proprietary hinge saddle 5/8" roller carrier system minimizes stress on the end hinges by segregating hinge and roller carrier loads
- 5/8" long stem rollers for superior strength and long life
- Height and width combinations up to 2200 pounds total door weight without a standard dual shaft requirement or center cable pick-ups
