

# Amarr and LEED®

LEED®<sup>1</sup> (Leadership in Energy and Environmental Design) is a voluntary, consensus-based, rating system for developing high-performance, sustainable buildings, developed by The U.S. Green Building Council (USGBC).

Amarr Aluminum Full View Sectional Door products positively contribute to the following **LEED®** Credits for Green Building Design & Construction:

## **Materials & Resources, Credit 2.1 and 2.2 Construction Waste Management**

Over 95% of our product components are recyclable; therefore, scrap produced during construction can be diverted from landfills through use of a construction waste management plan.

## **Materials and Resources Credit 4.1 and 4.2: Recycled Content Percentage**

*Requirements:*

Use materials with recycled content such that the sum of postconsumer recycled content plus 1/2 of the preconsumer content constitutes at least 10% or 20%, based on cost, of the total value of the materials in the project.

The minimum percentage materials recycled for each point threshold is as follows:

Recycled Content	Points
10%	1
20%	2

Amarr Aluminum Full View Sectional Door products are positive net contributors to Materials & Resources Credits 4.1 & 4.2 10% and 20% recycled goals. Content percentages are listed below.

Amarr Model	Previous Amarr Model Name	Recycled Content % <sup>2</sup>	Pre-Consumer	Post-Consumer
Amarr 3502	Model 3500	47%	55%	19%
Amarr 3552	Model 3550	47%	55%	19%

## **Materials and Resources Credit 5.1 and 5.2: Regional Materials**

Manufacturer Locations:

- 3800 Greenway Circle, Lawrence, KS 66046

## **Indoor Environmental Quality Credit 8.1: Daylight**

*Requirements:*

Provide building occupants with a connection between indoor spaces and the outdoors through the introduction of daylight and views into the regularly occupied areas of the building by achieving daylighting in 75% of regularly occupied spaces.

Regularly Occupied Space w/ Daylighting	Points
75%	1

**Indoor Environmental Quality Credit 8.2: Views**

*Requirements:*

Provide for the building occupants a connection between indoor spaces and the outdoors through the introduction of daylight and views into the regularly occupied areas of the building by achieving direct line of sight to the outdoor environment via vision glazing between 30 inches and 90 inches above finish floor for building occupants in 90% of all regularly occupied areas.

Regularly Occupied Space w/ Direct Line of Site to Outdoor Environment	Points
90%	1

<sup>2</sup>Percentages are based on information received from our vendors and have been represented to Amarr as true and accurate.
